

Mac users with M1 Chips

If you cannot download and install FortiNAC on your computer and receive Rosetta messages, follow the instructions below.

1. If you have a hotspot, please connect to your hotspot
2. If you do not have a hotspot, go to Noss 221 and follow these instructions. Stay here until you are finished.
3. Connect to wifi network M1 Chip
4. The password is Vulcans2021
5. Download and install the Intel version of Google Chrome from <https://google.com/chrome>
6. You should be prompted to install Rosetta. If you are successful skip to step 9.
7. If you already have Chrome installed, you will need to manually download Rosetta.
8. Launch Terminal. You can find this by using command+space and search. It's also in the utilities folder
9. Type in `/usr/sbin/softwareupdate --install-rosetta --agree-to-license`
10. Once Rosetta is installed, reconnect to CALNET and go to [connect.calu.edu](https://campusmgrrc.calu.edu/registration) – if you are not redirected, go to <https://campusmgrrc.calu.edu/registration>
11. Click the link to log in with your PennWest credentials.
12. Sign in with just the first part of your username – for example stu1234 and your current e-mail password. If you need to reset your password, go to <https://passwordreset.microsoftonline.com>
13. Download and install FortiNAC. Sign in again.

15. Test to make sure you can get out to a non-calu or non PennWest website, for example YouTube, Instagram, the news, etc.
