Timeline for change of major to be effective per Policy AC038:
An undergraduate student may change or add a major up to the date that Financial Aid is disbursed for that term if they wish for the change to be enacted in that semester. This date occurs near the second week of the semester.

If the student requests a major change after that date, the change will be enacted the subsequent regular semester. The only exception to the above is if the student is graduating in the term when they request the new major; in this case, the change will occur in the same semester. A student may add or drop a minor or concentration for the current term at any time.
